Certifications

We are approved by

Paper Quality

All paper is sourced from world's best European suppliers who are compliant with PEFC, FSC (TM) standards. Paper used is biodegradable and organically recoverable i.e. recoverable through industrial composting. These standards ensure that material used in paper manufacturing is responsibly sourced and is not impacting environment and surrounding communities negatively.

Natural Arabic Gum is used in making the cones. We do not use Ethyl Vinyl Acetate (Chemical glue) which dries out quickly. Hence, it takes us longer to make our cones but ensures chemical free all natural smoking experience.

Quality We Stand by
